

A photograph of three sheep in a green field. The sheep are white with thick wool. One sheep is in the foreground, looking directly at the camera. Two other sheep are behind it, one slightly to the left and one to the right, also looking towards the camera. A blue decorative swirl is overlaid on the image, passing through the 'PAXTON' text.

PAXTON STUD

3RD TWILIGHT ON PROPERTY SALE

PAXTON POLL DORSET AND WHITE SUFFOLK STUD

Wednesday, 23rd September 2020 at 4:30pm
"Broadview" 942 Broadview Road, Western Flat

Martin and Kirsty Harvey welcome you to their third annual twilight on property sale of Paxton White Suffolk and Poll Dorset rams.

The Paxton Stud has been breeding Poll Dorset sheep for over 40 years, with the stud starting on Allendale bloodlines.

White Suffolks have been bred since the beginning of the breed over 30 years ago, using an infusion of Allendale Suffolks over Paxton Poll Dorset ewes.

The Paxton Stud prides itself on structural soundness, high growth, well-muscled, easy care paddock reared rams.

At the conclusion of the sale we invite you to join us for refreshments.

Rams will be penned by 2.30pm with the sale commencing at 4.30pm.

Paxton Stud have MN2 vaccinated status in the OJD Market Assurance Plan (S396) and is Ovine Brucellosis Accredited (Flock no. 470)

Robin Steen P: 0428 838 195
Ray Jaensch P: 0439 870 682

We offer a rebate of 3% to outside agents introduced in writing 24 hours prior to sale. No delivery will be permitted before the end of the sale unless by prior arrangement.

PAXTON STUD

Martin and Kirsty Harvey would like to thank Robin Steen, Ray Jaensch and the whole PPHS team for their fantastic support.

Regulin improves the reproductive performance of sheep.
It's that simple.

Fewer dry ewes, more twins and a tighter lambing window all add up to more lambs. **20% more.***

If you join early and your ewes are in good condition, Regulin can improve your production and profits this year.

REGULIN®
MORE LAMBS WHEN YOU WANT THEM

If not this year, when?

*Average increase in paddock trials. Individual results may vary. Works in all breeds of sheep. Regulin is licenced for use in ewes and rams in Australia by Ceva Animal Health Pty Ltd, 11 Moores Road, Glenorie NSW 2157 ACN 002 692 426

TIPS TO REMEMBER ABOUT LAMBPLAN EBV'S

1. For most commercial operations, BETTER GROWTH is vital. Rams must have +ve EBV's for weight
2. The importance of Fat and Muscle EBV's depends on how the lambs will be sold and at what weight
 - a. For trade lambs sold in saleyards, Fat and Muscle not so important
 - b. For heavier lambs sold via Value-based Marketing (contracts, grids etc) Fat and Muscle are very important
3. Indexes are a guide – they may help the buyer or talk to your ram supplier to get the right EBV's
4. Every 1kg EBV for weight is worth 0.25-0.33kg extra carcase weight: \$400-\$500 extra over the life of a ram.
5. The 3 T's – Teeth, Testicles and Toes. Rams must have sound mouths, 2 functional, firm testicles and 4 clean, strong feet and toes.

TRAITS THAT DEFINE THE VALUE OF TERMINAL SIRE

The skills in selecting sires for lamb production is to identify those sires that have desirable genes that produce lambs with high growth rate, low fat (lean) and better carcass formation. At present, we cannot directly measure the genes of an animal. LAMBPLAN can however provide an estimate of the value of a sire's genes by looking at his own performance for certain traits and that of his relatives. This estimate is called an Estimate Breeding Value (EBV). For terminal sires there are three main traits to concentrate on, these being;

1. Post weaning weight (PWWT) – describe the animal genetic merit growth rate. A positive EBV means the animal's progeny will be genetically faster growing. That is they will reach market weight at an earlier age.
2. Post weaning fat (PFAT) – describe the value of each animal's genes for fat depth at constant weight – a negative EBV means that an animal progeny will be genetically leaner animal.
3. Post weaning eye muscle depth (PEMD) – describe the value of each animal's gene for eye muscle depth at constant weight – a positive EBV means a genetically thicker-muscled animal, and one that will have slightly more of its lean tissue in higher-priced cuts.

MANAGEMENT OF YOUR NEW RAM

Paxton Stud has done their best to present their annual draft of structurally sound rams for your selection.

All rams from "Broadview" are Brucellosis free, MN2 status and OJD vaccinates. Recently, they have been backlined, drenched with TriGuard oral and 6 in 1 vaccinated.

All rams have received 3 pellets of Regulin immediately prior to sale.

We may suggest you insure your ram for the next 6 months. He will be more susceptible to injury, death and loss of use in this time than in any other period of his life.

Try and avoid putting new rams with old rams prior to mating.

From here on this management is your concern and will influence what his productive life will be in your breeding program.

We wish you every success with your purchase.

PAXTON STUD
